

## ABSTRACT

5 A sign or ornament comprising an etched or otherwise formed translucent  
light scattering design, lettering, or shape within a matrix contained in the body of a  
sign or ornament, said sign or ornament having included therewith at least one  
opening, said opening having contained therewith at least one light source and  
preferably a light-emitting diode, wherein light emerging from the light source and  
preferred light-emitting diode incident upon the light scattering translucent design  
10 lettering or shape of the sign or the ornament will be enhanced to a much greater  
extent than any light emanating from the transparent portions of the sign/ornament.
